HCD-302 HVAC CONTROL AND DISTRIBUTION FOR FACILITIES MAINTENANCE

The course explains controlling air distribution for the comfort of people and is designed for any worker involved in air distribution systems. Takes students from the basics of HVAC electrical controls through air distribution and troubleshooting. Attendees are taught how to “control” their electrical controls and use fundamental air distribution principles for achieving consistent HVAC comfort and efficiency in buildings, plants and facilities. HVAC system problems can be divided into three major categories - Air Distribution, Electrical or Mechanical. The part that causes most service headaches is the electrical portion and most of that can be traced back to control problems. A lot of the training concentrates on overcoming the most common service problems encountered in HVAC systems by teaching students to understand, troubleshoot and test HVAC electrical controls.

THERMODYNAMICS

- Objectives
- Principles and fundamentals of heat transfer
- Pressure and vacuum
- Pressure/temperature/volume relationships
- Gas laws
- Cycle construction

VAPOR-COMPRESSION REFRIGERATION CYCLE

- Heat-transfer process
- Follow the heat
- Typical operating conditions

REFRIGERANTS AND OILS

- Refrigerant composition
- R-410A
- Refrigerant classifications
- Refrigerant safety
- Refrigerant cylinders
- Environmental refrigerant regulations

REFRIGERANT EQUIPMENT COMPONENTS

- Evaporators
- Compressors
- Condensers
- Metering devices
- Refrigeration-system accessories

HEAT LOAD IN REFRIGERATION SYSTEM

- Survey
- Calculating the total product load

- Miscellaneous heat load
- ### PSYCHROMETERICS
- Psychrometrics
 - Comfort
 - EPA 420-K-02-003
 - Moisture control in the mold control
 - Humidity
 - Preservation
 - Dew point
 - CRM Requirements
 - Air Condition System Design

BASIC ELECTRICITY

- Basic electricity & Ohm's Law
- Meters & tools for taking electrical measurements
- Electrical circuits: series & parallel

CONTROL CIRCUITS

- Schematics
- Ladder Diagrams
- Developing Wiring Diagrams

CONTROLS

- Overloads
- Relays
- Contactors
- Control Transformer
- Starting Relay
- Defrost Timer
- Thermostat
- High Pressure Control
- Low Pressure Control
- Oil Pressure Control

TROUBLESHOOTING

- General Troubleshooting
- Commercial Air Conditioning
- Heat Pump Control
- Pump Down Cycle

DETERMINING AND IMPROVING AIR FLOW

- 400 cfm per ton
- How many square feet per ton
- Air mixture at the cooling coil

EXHAUST AIR

- Positive pressure
- Negative pressure

MAKE-UP AIR

- Positive pressure
- Negative pressure
- Conditioning the “make up” air

TROUBLESHOOTING THE AIR DISTRIBUTION SYSTEM

- Temperature difference acrosscoil
- Balance in the system
- Short cycling
- Duct sizing
- Noise
- How to use a Ductulator

CLASS FORMATS AVAILABLE

- MTI Hands-On Center \$995/person
- ZOOM Interactive (Not Available)
- On-Site (Your Location) Ask for Quote
Quick Quote Available in 48 hrs.

CLASS DURATION

2-days, 15 hours of instruction
 25% Hands-On

Class Details: Each student will receive class books, work activity sheets, self-test progress evaluations, as well as questions from the instructor to make sure they understand the material presented. It is expected that an attendee will leave the class with the basic knowledge of the subject and possess new found skills to better equip them when they return to their job. A certificate suitable for framing will be issued to each attendee who successfully completes the course. Call, email or check the website for the next time this course is scheduled at the MTI training center. On-site sessions? Request a quick 48-hour turnaround quote. Revised: 02/06/2021
